Bred by: Stewart Duroc Farm  
Waverly, IA

**ON THE FARM PERFORMANCE**

143 Days to 250 lb, 0.66 BF

Outlook 144-1 was the popular 2nd place Stewart boar from Class 5 at the 1991 World Pork Expo. He is an extra wide based, level designed, heavy structured boar that displays excellent muscle shape down his top, has a big thick rump and a deep full ham. A well-balanced, super sound boar, Outlook 144-1 combines the superior performance and leanness of his outstanding sire, Outlook 2000, with the excellent sow productivity and underline quality of the Agile line of his dam. A problem free, superior performing boar, Outlook 144-1 will generate offspring that will excel in the basics needed for profitable hog production.
